

USDC IN CIRCULATION
As of June 18, 2021

USD Coin (USDC) represents a major breakthrough in how we use money. Digital dollars work like other digital content — they move at the speed of the internet, can be exchanged in the same way we share content, and are cheaper and more secure than existing payment systems.

USDC is issued by regulated financial institutions, backed by fully reserved assets, redeemable on a 1:1 basis for US dollars, and governed by Centre, a membership-based consortium that sets technical, policy and financial standards for stablecoins.
